

Fort Benning continues to see the effects of recent heavy rains, with road closures, detours and changes to traffic patterns. Commuters, specifically those entering and leaving Main Post on Benning Blvd and from Eddy Bridge, will be most affected.

Road blocks and detours are clearly marked, but commuters should be prepared for delays coming onto post, and expect continued delays upon arrival. Drivers are encouraged to start commutes earlier in order to allow for more drive time to work.

Portions of 10th Division Road, Sightseeing Road, Sunshine Road and Way Street are closed due to water damage, and detours are in effect until repairs are complete. Specific traffic areas affected follow:

10th Division Road between Edwards Street and Sigerfoos Road is closed to all traffic, to include vehicles, cyclists, runners and walkers.

Sunshine Road is closed to all traffic, so those traveling to and from the Eddy Bridge Access Control Point will be rerouted from Dixie Road to Jecelin Road to 82nd Airborne Division Road or Indianhead Road to Bradshaw Road to 82nd Airborne Division Road around the back of the airfield.

Units and individuals conducting Physical Readiness Training, running formations or road marches are also impacted, as Edwards, Vibbert, Wold, Lumpkin, 82nd Airborne Division, Jecelin, Sightseeing (south of Dixie), Sunshine, Bradshaw and Indianhead roads are temporarily off limits until further notice. Units are being notified through command channels of alternate routes and changes to training areas.

Motorists should continue to use caution and heed road closure and detour signs. Bypassing temporary road blocks and barriers is unsafe and illegal.

In addition, the Smith Fitness Center pools are closed, in order to repair water damage to the roof.

Updates to road closures will continue to be posted on the MCoE website and MCoE and Garrison Facebook page.
